

GDA Read-Only E2E Report

Generated: 2026-04-27T17:58:19.289Z

Overall: PASS

Safety: read-only; no saves, sends, deletes, or production data changes

Metric	Value
Journeys tested	5
Journeys passed	5
Journeys failed	0
API checks	7
API checks passed	7
Direct n8n webhook calls	0
Browser console errors	0
Blocking failed requests	0
API auth failures	0

Journey Results

Journey	Status	React route	API checks passed	Flags
Launchpad dashboard E2E	PASS	#launchpad	3/3	
Semantic search E2E	PASS	#launchpad	1/1	
Opportunity tracker read/search E2E	PASS	#opp-tracker	1/1	
Morning briefing latest E2E	PASS	#daily-brief	1/1	
Platform health summary E2E	PASS	#platform-health	1/1	

Interpretation

This is the first business-journey E2E layer. It is stronger than the basic smoke tests because it checks both the React page and the matching server-side API proxy path for each read-only journey.

It still does not test write actions, sends, paid API-heavy actions, or opportunity-stage changes. Those require dry-run mode or human approval.
